🕸 [nexchain.ai](#)

## Analysis

### Strength

Audit claimed (CertiK/SolidProof); simple OZ ERC-20, 0% tax; active marketing/press with visible X & Telegram activity.

### Weakness

Ownership not renounced; 100% of 2.15B NEX in EOA 0x387e...9877; presale funds to EOA; no on-chain vesting or LP locks; single holder = total centralization.

### Opportunities

Risk drops only if funds move to multisig+timelock and all allocations go into audited vesting & LP lockers with public links; otherwise claims stay unverifiable.

### Threats

Owner can withhold buyer tokens, never list, or dump; can drain presale funds anytime; no refunds/lock dates; unclear team—rug-style risk remains high

## Join the hunt

Get daily alpha, presale reports, and catch the next 100x baby coins before they explode.
